

List of figures, tables and cases

PART TWO: HEALTHY CHILDREN: FROM SURVIVAL TO OPTIMAL DEVELOPMENT

Boxes

Box 1: Article 24(2) of the Convention on the Rights of the Child	22
Box 2: Minimum core of the right to health	23

Figures

Figure 1: How the Constitution and the Children's Act give effect to children's international rights to health	25
Figure 2: MDG 4 trend, with various under-five mortality rate estimates	30
Figure 3: Causes of death in newborns and children under five years, 2000 – 2005	31
Figure 4: Leading causes of death among older children, by age group and by sex, 2007	32
Figure 5: Key interventions to address the determinants of child illness and injury	33
Figure 6: The causes of malnutrition and proposed interventions	47
Figure 7: A continuum of care across a child's life	58
Figure 8: Coverage of key interventions for maternal, newborn and child health	62
Figure 9: A cycle of poverty	83

Tables

Table 1: Primary laws and key programmes for the realisation of children's socio-economic rights	25
Table 2: Socio-economic indicators with a critical impact on child health	35
Table 3: South Africa's progress towards the Millennium Development Goals: A summary of key indicators	38
Table 4: TB rates in a Cape Town community	42
Table 5: Progress towards child-specific targets set by the HIV & AIDS and STI National Strategic Plan	43
Table 6: Focus areas of the Integrated Nutrition Programme	48
Table 7: Prevalence of substance use among school children in Cape Town and South Africa	54
Table 8: National prevalence data on violent behaviour collected from 260 primary and high schools	54
Table 9: Prevalence of bullying among grades 8 and 11 learners from Cape Town and Durban schools	55
Table 10: As easy as ABC? An A to Z of basic health service interventions for child health	60
Table 11: Responses required to improve child health care in South Africa in the short and medium term	68
Table 12: Package of community-based mother, child and women's health and nutrition services	75
Table 13: Child- and family-friendly services	78
Table 14: Child-Friendly Healthcare Initiative – Standards for child-friendly care	79
Table 15: Factors affecting infant mortality	82
Table 16: Child poverty, hunger and access to services in the Western and Eastern Cape, 2008	83

Cases

Case 1: The South African Tuberculosis Vaccine Initiative	42
Case 2: The Healthwise intervention	56
Case 3: The Perinatal Education Programme and Eduhealthcare courses	67
Case 4: Mothers2mothers	72
Case 5: The Mbabakazi community-based care programme	73
Case 6: Addressing childhood burns	85
Case 7: Local partnerships for health – The Khayelitsha Task Team	86

PART THREE: CHILDREN COUNT – THE NUMBERS

Demography of South Africa's children

Table 1a: Distribution of households, adults and children in South Africa, 2008.....	99
Table 1b: Number and proportion of children living with biological parents, 2008.....	101
Table 1c: Number and proportion of children living with biological parents, 2002.....	101
Table 1d: Number and proportion of orphans, 2008.....	103
Table 1 e: Number and proportion of orphans, 2002.....	103
Table 1f: Number and proportion of children living in child-headed households, 2002 & 2008.....	104

Income poverty, unemployment and social grants

Table 2a: Number and proportion of children living in income poverty, 2002 & 2008.....	105
Table 2b: Number and proportion of children living in households without an employed adult, 2002 & 2008.....	106
Table 2c: Number of children receiving the Child Support Grant, 2005 – 2009.....	107
Table 2d: Number of children receiving the Foster Child Grant, 2005 – 2009.....	108
Table 2e: Number of children receiving the Care Dependency Grant, 2005 – 2009.....	109

Child health: The general context

Table 3a: Number and proportion of children living far from the nearest clinic, 2002 & 2008.....	110
Figure 3a: Age pattern of child mortality trends in South Africa, 1980 – 1998, using 1998 South African Demographic and Health Survey.....	111
Table 3b: Proportion of children under one year who have been fully immunised, 2003/04 – 2008/09.....	112
Figure 3b: Proportion of men and women reporting multiple sexual partnerships within a year, by age group.....	113
Table 3c: Proportion of teenagers (aged 15 – 19 years) engaged in sexual risk behaviour, 2007.....	114

Child health: HIV/AIDS

Table 4a: HIV prevalence in pregnant women attending public antenatal clinics, 2000 & 2008.....	115
Table 4b: Proportion of booked women attending public antenatal clinics who receive HIV testing, 2001 – 2008.....	116
Table 4c: Proportion of adults newly eligible for ART who initiate treatment, 2002 – 2008.....	117
Table 4d: Proportion of newly infected children who start ART, 2002 – 2008.....	118

Child health: Nutrition

Table 5a: Number and proportion of children living in households where there is reported child hunger, 2002 & 2008.....	120
Table 5b: Proportion of children affected by stunting, wasting and underweight, 2005.....	121
Table 5c: Proportion of children affected by vitamin A deficiency, iron deficiency and iron deficiency anaemia, 2005.....	123

Children's access to education

Table 6a: Number and proportion of school-age children attending an educational institution, 2002 & 2008.....	124
Table 6b: Proportion of children reported to be attending an educational institution, by age, 2008.....	125
Table 6c: Number and proportion of children living far from the nearest primary school, 2002 & 2008.....	127
Table 6d: Number and proportion of children living far from the nearest secondary school, 2002 & 2008.....	127

Children's access to housing

Table 7a: Number and proportion of children in formal, informal and traditional housing, 2008.....	128
Table 7b: Number and proportion of children living in over-crowded households, 2002 & 2008.....	129

Children's access to basic services

Table 8a: Number and proportion of children living in households with water on site, 2002 & 2008.....	130
Table 8b: Number and proportion of children living in households with basic sanitation, 2002 & 2008.....	131
